

Resource Conservation Since 1966

Safety

Allergies - Some programs involve the use of fur or feathers. Teachers or other group leaders are requested to check for allergies to these ahead of time and to notify Creature Teacher if this is the case. An alternate program can be scheduled for individuals with severe allergies.

Behavior around animals - Some programs involve the respectful use of live animals. Students will be instructed at the beginning of each program to avoid loud noises or sudden movement which may frighten an animal. No animal is to be handled without the direct supervision of the Creature Teacher.

Germs - Be sure student **WASH THEIR HANDS** after each program, **ESPECIALLY** if they have touched an animal.

Tools and equipment - Some programs involve the use of tools and equipment. Students will be instructed in safe use and will be expected to follow rules.

Teachers are to **remain** with their group and to administer **discipline** should the need arise.

Disabled Students - Some programs involve games in which physical activity is involved. Programs can be modified to meet the needs of disabled students if the disability is known in advance. Notify the Creature Teacher if someone in your group has special needs.
